### About

---

Web developer with almost 2 years in this field. Passionate about creating web based, responsive and highly interactive UI's. Proficient in translating designs & wireframes into high quality code, and writing application code using React or JavaScript workflow.

### Languages

---

- English, Serbian, Croatian

### Skills

---

ReactJS	JavaScript
CSS	HTML5
Bootstrap	Redux
Material UI	NPM
Webpack	Babel
REST API	

### Education

---

2015 – 2019      **ETS Mihajlo Pupin,**  
Novi Sad, Serbia

### Projects

---

**GYM Tracker**, *React based Web App for tracking your progress in gym.*

Project is made using React, React Router, LocalStorage, and pure CSS for styling. It is made to keep track of your progress in certain weightlifting exercises, helping you see how much progress are you making, if any. Also has GuardianAPI integration for blog section, which contains news in fitness world. Project is in portfolio section of my website.

**Movie Search App**, *Made using React, integrating MovieDB API as backend.*

This app lets you keep in touch with latest movies out, movies that are yet to come out and movies that are currently trending. It has search component. Styling is inspired by YouTube's dark mode, and is done in pure CSS.

### Courses

---

**Modern React with Redux**, *Udemy* [↗](#)

**React Front to Back, by Brad Traversy**, *Udemy* [↗](#)

**The Complete JavaScript Course 2021: From Zero to Expert!**, *Udemy* [↗](#)
